EXPERIENCE

Senior Software Engineer **Beacon Biosignals**

Jan 2023 - Present | Los Angeles, CA

- Developed and maintained a suite of React-based applications that provided real-time data visualization and analysis of complex algorithms
- Leveraged GraphQL as the primary data-fetching and management layer
- Utilized React's component-based architecture to build reusable and modular UI components, maximizing development efficiency and minimizing duplication of code

Full Stack Software Engineer **Hearth**

Nov 2021 - Nov 2022 | Los Angeles, CA

- Developed, launched, and iterated on financial applications to help private contractors more effectively manage their businesses
- Developed web and native applications in React, React Native, and Typescript
- Developed backend services in Go
- Interviewed and effectively participated in the hiring and onboarding of new employees

Software Engineer **Vertafore**

Feb 2020 - Nov 2021 | Denver, CO

- Contributor and maintainer of greenfield products aimed at modernizing the insurance industry
- Contributor and maintainer to multiple custom in-house UI Libraries promoting UI/UX consistency across platform and company
- Mentored new developers as part of a mentorship pilot program

Software Engineer **Walmart**

Dec 2017 - Feb 2020 | Bentonville, AR

- Developed mobile and web applications using React
- Contributor to a cutting-edge team in supply chain technologies
- Frequently met with, and provided support to business partners while collecting feedback from end-users
